PostmixSirup24

PostmixSirup24 represents

VARIETY

SUSTAINABILITY

CUSTOMER SATISFACTION

Benefit from our large selection of varieties.
We have a wide range of over 20 PostmixSyrup varieties to choose from
at an unbeatable price-performance ratio.

WHY POSTMIXSIRUP - DIRECTLY FROM THE MANUFACTURER?

✓ **TOP QUALITY - MADE IN GERMANY**
With our PostmixSyrup we offer you guaranteed consistently highest quality

✓ **PRICE EFFICIENT**
PostmixSyrup - directly from the manufacturer - offers you an enormous savings potential

✓ **NO CONTRACTUAL OBLIGATION**
International shipping starting from 1x20l BIB or 2x10l BIB
Ask for our international shipping costs table!

✓ **ENVIRONMENTALLY FRIENDLY - MAXIMUM STORAGE BENEFIT**
No environmentally damaging transport of empties necessary.
20l PostmixSyrup is equivalent to approx. 11 crates (130Fl. à 1,0l)

✓ **ALSO FOR CONTAINER SYSTEMS**
Ideal for filling your stainless steel containers.
Our PostmixSyrup is compatible with all postmix systems.

COMPATIBLE WITH ALL POSTMIX SYSTEMS
(Bag-in-Box & Container)

We have all adapter kits at our disposal

10L BAG-IN-BOX

= approx. 65l finished drink (11 crates à 6x1,0Bottles)

20L BAG-IN-BOX

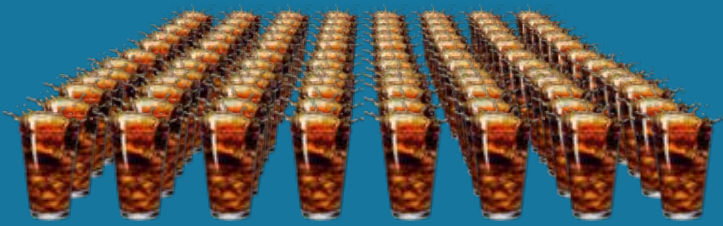

= approx. 130l finished drink (11 crates à 12x1,0Bottles)

MORE EFFICIENT USE OF GOODS & COST OPTIMIZATION

Compared to the purchase of expensive bottled goods or premix containers, the purchase of a Postmix system pays for itself very quickly. Even with low beverage sales a system usually pays for itself within the first year.

Operating your own postmix dispensing system is therefore cheaper than many believe. Don't hesitate and improve your shopping situation with your own dispensing system and our high-quality PostmixSirup.

Price: 4.999 EUR*

Leasing:

running time	monthly rate
36	157,47 EUR**
48	122,98 EUR**

TUTORIAL

How to set up your Postmix system perfectly

39,99 EUR*

REFRACTOMETER 0-18% BRIX

DELIVERY SCOPE:

Pipette, Screwdriver, Case

HOW TO SET UP YOUR POSTMIX SYSTEM PERFECTLY

- ✓ Read the recommended Brix value on the label.

YOU NEED A REFRACTOMETER TO DETERMINE THE BRIX VALUE

- ✓ Place the finished drink on the test glass surface using a pipette.
- ✓ Make sure that no air bubbles are being formed.
- ✓ Look towards the light through the eyepiece.
- ✓ Read the Brix value from the scale.

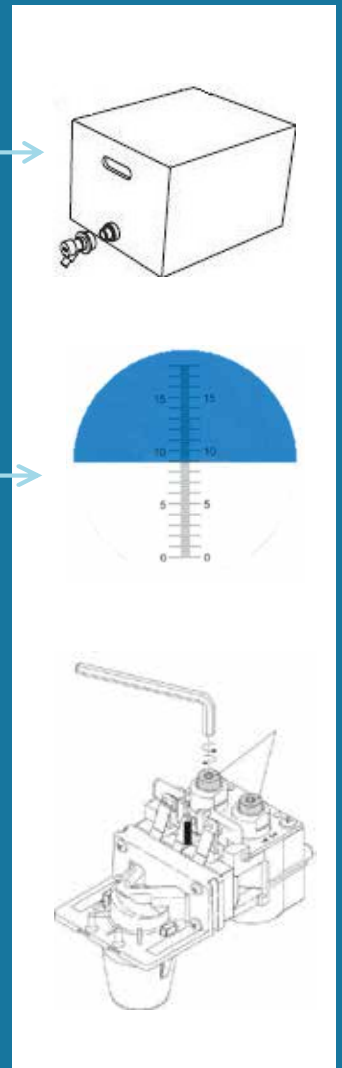

IF THE MEASURED BRIX VALUE IS DIFFERENT FROM THE RECOMMENDED BRIX VALUE, THE WATER-SYRUP RATIO SHOULD BE CORRECTED.

- ✓ In order to regulate the flow velocity you need a Wrench.
- ✓ The left flow controller determines the flow rate of the water.
- ✓ The right flow controller determines the flow rate of the syrup.

Now adjust the flow rates until the Brix value of the finished drink corresponds to the recommended Brix value. Please note that turning it clockwise increases the flow rate.

AVOID OVERFOAMING

- ✓ In order to avoid excessive foaming when tapping beverages from the Postmix system, the flow rate should be reduced.

INDIVIDUAL DISPENSING SYSTEMS

THE RIGHT DISPENSING SYSTEM FOR EVERY NEED

Depending on requirements, size, dispensing volume and design, we have the right dispensing system for you - perfectly matched to your business and your needs.

We will be happy to advise you and explain the various advantages of the various systems in terms of handling, performance and space requirements.

- ✓ Best soda water quality due to constant impregnation performance
- ✓ Different sizes & different performances
- ✓ Thermostatically controlled water bath & additional cooling
- ✓ One central carbonator can supply several stations

POSTMIX HIGH PERFORMANCE DISPENSING SYSTEMS

Our K-series recirculating carbonators are a guarantee for the best soda quality - available in different sizes and with different outputs depending on the requirements.

Soda Circuit Carbonator K55	2.999 EUR*	Dimensions (HxWxD): 640x820x460 mm
Soda Circuit Carbonator K95	3.499 EUR*	Dimensions (HxWxD): 620x900x550 mm
Soda Circuit Carbonator K145	4.499 EUR*	Dimensions (HxWxD): 620x980x550 mm

CONNECTORS AND ADAPTERS

Our syrups are compatible with all common post-mix systems. We have various Postmix adapter kits at our disposal. This allows you to connect our high-quality Postmix syrups to your existing Postmix system - whether container system or bag-in-box system. To connect our Postmix syrups, we use a NC connector, which is available in 3 versions

NC Connector
7mm Hose

NC Connector
10mm Hose

NC Connector
7/16 Thread

FOR BAG-IN-BOX POST-MIX SYSTEMS

For Postmix systems with connectors for Coca Cola® or Pepsi® you will need a Bag-in-Box adapter to connect our syrups.

Coca Cola® to
NC Connector

Coca Cola® light to
NC Connector

Pepsi® to
NC Connector

Lipton® to
NC Connector

NC Connector to Manual Tap
(For Manual tapping)

FOR CONTAINER POSTMIX SYSTEMS

With just a few simple steps you can convert your existing Postmix container system to Bag-in-Box use. With the container bag-in-box kit, you remain flexible and can decide at any time whether to use a container or a bag-in-box.

VERSION WITH BAYONET LOCK OR VERSION WITH TANK VALVE

POSTMIXSIRUP24 CONTAINER BAG IN BOX CONVERSION KIT

1 Connection on the gas side of your container dispensing system

2 Beverage side connection of your container dispensing system

3 Connection Bag in Box PostmixSirup24

SYSTEM REQUIREMENTS

For the installation of a Postmix system you need:

Power supply: 230 V
CO2 bottle (carbonic acid)
Water connection: 3/8"
or 3/4" external thread

DELIVERY SCOPE

The delivery of our post-mix systems includes installation kit as standard.

The installation kit includes all components required for the installation of the Postmix system:

- ✓ Water filter
- ✓ CO2 Pressure Reducer
- ✓ Syrup pumps
- ✓ NC-Connectors
- ✓ Hoses
- ✓ Clamps
